HS ANALYZE RACE, ETHNICITY, AND CLASS IN SPORTS.DOCX

Teaching Notes:

Sports in United States History is a new elective available to high school students in Georgia. This QFT lesson addresses the standard that requires students to analyze race, ethnicity, and social class in sports. Using baseball as a case study, the Q Focus utilizes the juxtaposition of two primary sources directly addressing the standard.

The Library of Congress has a rich repository of primary sources that address the standard. The lesson utilizes primary sources and a background reading from the *Baseball Across a Changing Nation* text set.

The Question Formulation Technique (QFT) for Primary Source Learning - To improve

Teaching Notes:

Hello Dara,

Reinforcing what I mentioned when you first posted this QFocus concept, I applaud the provocative, but smart resource you selected--fabulous spark to a fun learning experience! Regarding your lesson design, I also see value in the peer-to-peer engagement through the circulation technique. From the teacher's perspective, this will provide you with a great look at contrasting perspectives and that could lead to a bounty of fun follow-on activities such as debate, creative writing, image makeover, etc. Well done!

Kind regards,

Steve

QFT - (SOCIAL) MEDIA USAGE, OBJECTIVE AND SUBJECTIVE ANSWERS, AND ESSAY WRITING

Teaching Notes:

In this lesson plan I describe how I'd use QFT to encourage my students to ask questions about (social) media usage. We then use both objective/factual and subjective answers/opinions to write an essay in which the students argue whether or not they think media usage is bad.

Unfortunately my sources are in Dutch, but no doubt you'll be able to find the same sources in English! (I tried a quick search but wasn't satisfied with what I found - but if anyone has suggestions, feel free to comment!)

Teaching Notes:

steve, sorry, one more thing! i love your suggestion about the image makeover. Have you ever done that? Do you have any resources on that?

Also, if you have other follow on activities suggestions, i would love to hear them!! I am new at this! thank you so much!

Teaching Notes:

Hi Steve! Thank you so much for your positive feedback! I really enjoyed reading our lesson plan!

Firstly, I LOVE that quote from things they carry. It's so powerful. I also really liked your plan of having students write the gimkit journal entry around their partners questions. This practice encourages active listening and by extension, learning from one's peer in such an organic way. Another component I love is your adaptation of the see/wonder routine for the categorization instructions. I am going to remember to try that one!! And one last thing, the authentic audience is also great!

I respect and appreciate the way in which you are honoring veterans; by teaching the next generation to do so.

SLIDING ROCKS- PHYSICS MEASURING MOTION LESSON USING QFT-PRIMARY SOURCE.PDF

Teaching Notes:

In this lesson, we will start investigating the measurement of motion. Below are the lesson objectives:

- explore measuring motion (how do we know the rock is moving). The questions from the QFT will lead to the shared experiences that will be applied to answering the QFT questions
 - distance/displacement (experience with walking lab- apply)
 - acceleration of rock (experience with “How does a pedometer work?”)
 - velocity/speed (students design an experiment measuring position, velocity, acceleration of a person’s movement and graph data against time)
 - force and acceleration relationships (force to move experiment) [9 - 12](#) [Science](#) [Physics](#)
