

ALBUM [DEVELOPMENT OF PRECISION MANUFACTURING AT THE
SPRINGFIELD ARMORY](#)

Album Description

[Rachel Panasci Lima](#) ,

[Rich Cairn](#)

**IMAGE 301 OF THE WAR OF THE NATIONS : PORTFOLIO IN ROTOGRAVURE ETCHINGS :
COMPILED FROM THE NEW YORK TIMES (NEW YORK), 1919**

Teaching Notes:

Headline: Speeding Up American Production of War Munitions

Caption (lower photo): Parts of rifles being assembled at the government armory at Springfield, Mass., which has a capacity of a thousand complete rifles a day. The Springfield rifle is considered the most effective in the world.

Date: 1919

Reference Link: <http://www.loc.gov/resource/collgdc.gc000037/?sp=301&q=springfield+armory&r=0.08,0.691,1.344,0.775,0>

Summary: Contains 1,398 rotogravure images with brief descriptive captions, broad organizational headings, and a table of contents; 32 maps that describe military engagements throughout the war; and a 3-page appendix that provides a chronology, statistics, treaty excerpts, and highlights of wartime events.

Contributor Names: Library of Congress

Created / Published: New York : New York Times, Co., 1919.

Subject Headings: - World War, 1914-1918--Pictorial works

- United States--New York--New York

Teaching Notes:

This early 20th century photo captures the main arsenal building of the Springfield Armory.

"The Armory at Springfield, Massachusetts, began as a Revolutionary War *arsenal* (a storage and supply depot, as opposed to an *armory*, where weapons are made) responsible primarily for repairing small arms, making gun carriages and musket cartridges, and storing powder and various war materials. The arsenal was the scene of a battle during Daniel Shay's rebellion in 1786."

-from the ForgeOfInnovation.org website text.

The story of the Springfield Armory, and its role in pioneering the use of gauged, machined parts that enabled precision mass production, is told on the Armory's website:

Teaching Notes:

When the armory was established in 1794, the Mill River was where it established a series of early workshops, at three different falls. In the 1850s, these facilities were reorganized into a single site, with the first of the present buildings built in 1857. Over the next four years, additional buildings augmented the capabilities of the site, giving it sufficient capacity to meet the armory's heavy manufacturing needs. The dam and canal were built to raise the level of Watershops Pond, and new turbines were installed to provide 300 horsepower for the facilities.

The Water Shops complex is now a privately owned industrial site. The main building was severely damaged on Friday June 17, 1988, when a fire destroyed part of the top floors. The building was built in two different sections: the first was built in 1858, and the second section, which paralleled Allen Street and was built in 1901, is where the fire happened. 1899-KNOX

3X412.JPG

Teaching Notes:

[The Lyman and Merrie Wood Museum of Springfield History](#) features the products of the Springfield Armory's legacy of precision manufacturing. In addition to the Firearms Collection with the largest collection of Smith & Wesson guns in the world, it has a definitive collection of Indian motorcycles, and a collection of early automobiles which includes an 1899 Knox, a 1901 Crestmobile, a 1925 Rolls-Royce roadster, and a 1928 Rolls-Royce roadster.
