## PARENTS PACK PERSONAL STORIES – INFLUENZA

### Teaching Notes:

"What we don't often stop to consider is how families can be affected over time — even generations later; their family trees forever altered by diseases. The 1918 pandemic is an extreme example of what a disease can do. Yet the reality is, even one family member lost to a disease such as influenza, measles, meningitis or a host of others, forever changes a family — leaving an everlasting *what if*."
